How many people in Uzbekistan practise speaking English on SpeakPal Club?

According to SpeakPal Club data (6 Aug-3 Nov 2026), 15,698 learners in Uzbekistan had at least one real conversation (30 s or longer) in 90 days, 45.7% of all 34,348 such learners worldwide, taking part in 370,786 real-conversation sessions.

Because Uzbekistan makes up almost half the sample, SpeakPal Club's global figures lean heavily towards Uzbek learners. Country is inferred by the analytics platform and may be affected by VPNs or travel. Sessions are not halved for a single country because a call between two Uzbek learners is logged twice and a cross-border call once.

How long are English speaking practice conversations in Uzbekistan?

According to SpeakPal Club data from 370,786 real-conversation sessions by Uzbek learners (Aug-Nov 2026), the median conversation lasted 4 minutes 20 seconds (260 s), shorter than the worldwide median of 4 minutes 58 seconds; 31.8% lasted 10 minutes or more.

Call length	Sessions in Uzbekistan	Share
0-10 s	398,876	42.7%
10-30 s	163,929	17.6%
30-60 s	80,373	8.6%
1-3 min	77,545	8.3%
3-10 min	94,884	10.2%
10 min or longer	117,984	12.6%

Sessions under 30 seconds (60.3%) are treated as connection attempts: the 30-second line excludes dropped or failed connections, most of which end in under 10 seconds. Including them, the average session lasted 3 min 44 s (224 s); counting only real conversations, the average is 9 min 13 s (553 s) and the median 4 min 20 s.

SpeakPal Club is a free-to-use app (free calls have a per-call time limit) with 1:1 voice calls with other learners and native English speakers; 15,698 learners in Uzbekistan had at least one real conversation on it between August and November 2026.

Methodology and limitations

Figures come from read-only SpeakPal Club product analytics (Amplitude) queried on 4 November 2026 and match Study 1 (conversations, length, goals, return rates; 6 August-3 November 2026, Europe/Madrid), Study 2 (peak hours; 27 October-3 November 2026, Asia/Tashkent) and Study 3 (levels and native languages). A real conversation is a completed call of 30 seconds or longer, a line chosen to exclude dropped or failed connection attempts, most of which last under 10 seconds; shorter sessions are connection attempts. Figures were re-pulled on 4 November 2026 with this 30-second threshold (an earlier version used 60 seconds). Both participants log every call; per-learner figures are unaffected, while session counts are not halved for a single country. Return rates are N-day rates for cohorts from 6 August to 4 October 2026, so every learner had 30 days to return. Levels, goals and native languages are self-reported; country is IP-inferred. An earlier draft used all sessions including drop-offs (for example 49.4 "calls" per learner and a 3 min 44 s average); those figures are superseded.
